GAIN MORE VALUE FROM GLOVIA G2

CrescentOne's GLOVIA G2 ERP platform has proven to deliver outstanding business value. The CrescentOne Academy courses provide the knowledge and skills required to use this to its full advantage. Our tracks are targeted towards application managers and end-users.

Learning through the CrescentOne Academy
The courses will help:
- to gain more value from GLOVIA G2 by using features, functions and capabilities in the application
- with a quick return on investment by compressing what would have been a gradual progression over a long period of time
- with getting new employees up to speed quickly and efficiently
- to educate end-users to become experts in their role

Different types of courses
We offer different types of couses that are part of predefined tracks. Students from different companies are able to join an open class at Brainport Industries Campus (BIC) Eindhoven. Alternatively, on-site courses are offered as well.

Fundamentals – FUNA01 Introduction

INTRODUCTION TO ENTERPRISE RESOURCE PLANNING (ERP)

The general business processes are covered in the introduction course. The goal is to achieve fundamental knowledge and understand coherence of business processes and how an ERP solution is supporting these. This course offers a great deal of suitable explanations and demonstrations. At the end of the track students will have a good basic understanding of ERP.

Target audience
This course is suited for all employees and is not role specific.

Topics
1. Enterprise Resource Planning
2. Supply Chain Management
3. Introduction to Make to Order (MTO) business processes

Objectives
At the end of this course, students will be able to understand:
- and explain concepts of the supply chain
- business processes and roles in an organization
- the impact of working together based on predefined business processes
- the coherence with the supporting GLOVIA G2 ERP solution

Prerequisites
Some basic understanding of business processes will be helpful.
